

Bayswater, London, W2 6JF

£1,100 pw

5 Bedrooms

4 Bathrooms

A stunning newly refurbished house in a lovely residential area of Bayswater. The property has 5 double bedrooms, two of which are master en-suites, and 4 bathrooms. The living room is expansive and there is a large separate kitchen with dining area. The house is arranged over three floors and has been refurbished to a very high spec. Further benefits are wooden flooring throughout, gas central heating with underfloor heating in the kitchen and bathrooms, air conditioning, and every room has UK and international satellite connections. There is an indoor parking space, and extensive storage space within the property. Just a moment's walk to Whiteleys mall and Bayswater Station, this house has prime location. Match Area: Bayswater

Director: S. Khalil

Registered in England No: 3378263 Registered Office: 21 George Street, London W1U 3QW VAT No: 815561727

Fees & Charges:

According to current legislation and based on information from the government website starting from the 1st June 2019 the only payments that landlords or letting agents can charge to tenants in relation to new contracts are:

- Rent
- a refundable tenancy deposit capped at no more than 5 weeks rent where the total annual rent is less than £50,000, or 6 weeks rent where the total annual rent is £50,000 or above
- a refundable holding deposit (to reserve a property) capped at no more than 1 week's rent
- payments associated with early termination of the tenancy, when requested by the tenant
- payments capped at £50 (or reasonably incurred costs, if higher) for the variation, assignment or novation of the tenancy
- payments in respect of utilities, communication services, TV license and council Tax
- a default fee for the late payment of rent and replacement of a lost key / security device giving access to the housing, where required under a tenancy agreement

Disclaimer

Whilst every effort has been made to ensure that the property details is correct, we cannot accept any liability for any errors/omissions and we firmly advise you to double check all detail and photos supplied on your own risk. Photographs show only certain parts of the property as they appeared at the time were taken. Please contact us for further information regarding Approved Cline Money Protection (CMP) scheme or the property ombudsman which we are a member of.

Energy Performance Certificate

131, Inverness Terrace, LONDON, W2 6JF

Dwelling type: Mid-terrace house
Date of assessment: 11 November 2014
Date of certificate: 11 November 2014

Reference number: 9798-6967-7299-2694-8944
Type of assessment: RdSAP, existing dwelling
Total floor area: 176 m²

Use this document to:

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:	£ 5,499
Over 3 years you could save	£ 2,538

Estimated energy costs of this home			
	Current costs	Potential costs	Potential future savings
Lighting	£ 492 over 3 years	£ 246 over 3 years	
Heating	£ 4,569 over 3 years	£ 2,457 over 3 years	
Hot Water	£ 438 over 3 years	£ 258 over 3 years	
Totals	£ 5,499	£ 2,961	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances like TVs, computers and cookers, and any electricity generated by microgeneration.

Energy Efficiency Rating		
<p>Very energy efficient - lower running costs</p> <p>(92 plus) A</p> <p>(81-91) B</p> <p>(69-80) C</p> <p>(55-68) D</p> <p>(39-54) E</p> <p>(21-38) F</p> <p>(1-20) G</p> <p>Not energy efficient - higher running costs</p>	<p>Current</p> <p>55</p>	<p>Potential</p> <p>81</p> <p>The graph shows the current energy efficiency of your home.</p> <p>The higher the rating the lower your fuel bills are likely to be.</p> <p>The potential rating shows the effect of undertaking the recommendations on page 3.</p> <p>The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).</p>

Top actions you can take to save money and make your home more efficient			
Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Increase loft insulation to 270 mm	£100 - £350	£ 406	
2 Cavity wall insulation	£500 - £1,500	£ 1,395	
3 Floor Insulation	£800 - £1,200	£ 225	

See page 3 for a full list of recommendations for this property.

To find out more about the recommended measures and other actions you could take today to save money, visit www.direct.gov.uk/savingenergy or call **0300 123 1234** (standard national rate). The Green Deal may allow you to make your home warmer and cheaper to run at no up-front cost.

Summary of this home's energy performance related features

Element	Description	Energy Efficiency
Walls	Cavity wall, as built, no insulation (assumed)	★ ★ ☆ ☆ ☆
Roof	Pitched, 12 mm loft insulation	★ ☆ ☆ ☆ ☆
Floor	Suspended, no insulation (assumed)	—
Windows	Fully double glazed	★ ★ ★ ★ ☆
Main heating	Boiler and radiators, mains gas	★ ★ ★ ★ ☆
Main heating controls	TRVs and bypass	★ ★ ★ ☆ ☆
Secondary heating	None	—
Hot water	From main system	★ ★ ★ ★ ☆
Lighting	No low energy lighting	★ ☆ ☆ ☆ ☆

Current primary energy use per square metre of floor area: 241 kWh/m² per year

The assessment does not take into consideration the physical condition of any element. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology based on age and type of construction.

See addendum on the last page relating to items in the table above.

Low and zero carbon energy sources

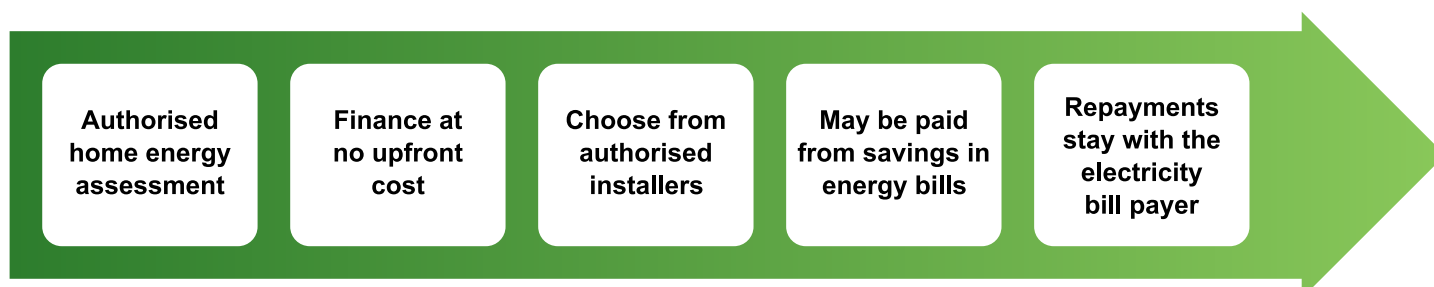

Low and zero carbon energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon. There are none provided for this home.

Opportunity to benefit from a Green Deal on this property

The Green Deal may enable owners and occupiers to make improvements to their property to make it more energy efficient. Under a Green Deal, the cost of the improvements is repaid over time via a credit agreement. Repayments are made through a charge added to the electricity bill for the property. To see which improvements are recommended for this property, please turn to page 3. You can choose which improvements you want to install and ask for a quote from an authorised Green Deal provider. They will organise installation by an authorised Green Deal installer. If you move home, the responsibility for paying the Green Deal charge under the credit agreement passes to the new electricity bill payer.

For householders in receipt of income-related benefits, additional help may be available.

To find out more, visit www.direct.gov.uk/savingenergy or call 0300 123 1234.

Recommendations

The measures below will improve the energy performance of your dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions you could take today to save money is available at www.direct.gov.uk/savingenergy. Before installing measures, you should make sure you have secured the appropriate permissions, where necessary. Such permissions might include permission from your landlord (if you are a tenant) or approval under Building Regulations for certain types of work.

Measures with a green tick  are likely to be fully financed through the Green Deal since the cost of the measures should be covered by the energy they save. Additional support may be available for homes where solid wall insulation is recommended. If you want to take up measures with an orange tick , be aware you may need to contribute some payment up-front.

Recommended measures	Indicative cost	Typical savings per year	Rating after improvement	Green Deal finance
Increase loft insulation to 270 mm	£100 - £350	£ 135	 D59	
Cavity wall insulation	£500 - £1,500	£ 465	 C70	
Floor Insulation	£800 - £1,200	£ 75	 C72	
Low energy lighting for all fixed outlets	£200	£ 69	 C73	
Heating controls (room thermostat)	£350 - £450	£ 54	 C75	
Solar water heating	£4,000 - £6,000	£ 48	 C76	
Solar photovoltaic panels, 2.5 kWp	£9,000 - £14,000	£ 258	 B81	

Alternative measures

There are alternative measures below which you could also consider for your home.

- External insulation with cavity wall insulation

Choosing the right package

Visit www.epcadviser.direct.gov.uk, our online tool which uses information from this EPC to show you how to save money on your fuel bills. You can use this tool to personalise your Green Deal package.

Directgov
Public services all in one place

Green Deal package	Typical annual savings
Loft insulation	Total savings of £681
Cavity wall insulation	
Heating controls	
Electricity/gas/other fuel savings	
	£6 / £675 / £0

You could finance this package of measures under the Green Deal. It could **save you £681 a year** in energy costs, based on typical energy use. Some or all of this saving would be recouped through the charge on your bill.

About this document

The Energy Performance Certificate for this dwelling was produced following an energy assessment undertaken by a qualified assessor, accredited by Stroma Certification. You can get contact details of the accreditation scheme at www.stroma.com, together with details of their procedures for confirming authenticity of a certificate and for making a complaint. A copy of this EPC has been lodged on a national register. It will be publicly available and some of the underlying data may be shared with others for compliance and marketing of relevant energy efficiency information. The Government may use some of this data for research or statistical purposes. Green Deal financial details that are obtained by the Government for these purposes will not be disclosed to non-authorised recipients. The current property owner and/or tenant may opt out of having their information shared for marketing purposes.

Assessor's accreditation number: STRO008273
Assessor's name: Miss Angela Harding DEA

E-mail address: epc@nichecom.co.uk
Related party disclosure: No related party

Further information about Energy Performance Certificates can be found under Frequently Asked Questions at www.epcregister.com.

About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions.

The average household causes about 6 tonnes of carbon dioxide every year. Based on this assessment, your home currently produces approximately 8.2 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. If you were to install these recommendations you could reduce this amount by 5.0 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Your home's heat demand

For most homes, the vast majority of energy costs derive from heating the home. Where applicable, this table shows the energy that could be saved in this property by insulating the loft and walls, based on typical energy use (shown within brackets as it is a reduction in energy use).

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	29,018	(2,849)	(9,795)	N/A
Water heating (kWh per year)	2,929
