Energy performance certificate (EPC)

21 Alloy House Moulding Lane	Energy rating	Valid until:	13 January 2029
LONDON SE14 6BH	B	Certificate number:	9548-8064-7389-6721-2900

roperty type

Mid-floor flat

otal floor area

50 square metres

les on letting this property

operties can be rented if they have an energy rating from A to E.

he property is rated F or G, it cannot be let, unless an exemption has been registered. You can read <u>guidance for landlords o</u> <u>regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-dlord-guidance)</u>.

nergy efficiency rating for this property

is property's current energy rating is B. It has the potential to be B.

e how to improve this property's energy performance.

Score	Energy rating	Current	Potential
92+	Α		
31-91	B	85 I B	85 I B
9-80	С		
5 <mark>-68</mark>	D		
9-54	E		
21-38	F		
-20	G		

e graph shows this property's current and potential energy efficiency.

operties are given a rating from A (most efficient) to G (least efficient).

operties are also given a score. The higher the number the lower your fuel bills are likely to be.

r properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

eakdown of property's energy performance

is section shows the energy performance for features of this property. The assessment does not consider the condition of a ature and how well it is working.

ch feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

nen the description says "assumed", it means that the feature could not be inspected and an assumption has been made sed on the property's age and type.

ature	Description	Rating
alls	Average thermal transmittance 0.18 W/m ² K	Very goo
ndows	High performance glazing	Very goo
ain heating	Community scheme	Very goo
ain heating control	Charging system linked to use of community heating, programmer and TRVs	Good
t water	Community scheme	Very goo
Inting	Low energy lighting in all fixed outlets	Very goo
tightness	Air permeability 3.0 m³/h.m² (as tested)	Very goo
of	(other premises above)	N/A
or	(other premises below)	N/A
condary heating	None	N/A

ow and zero carbon energy sources

w and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as we cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Community combined heat and power
- Solar photovoltaics

rimary energy use

e primary energy use for this property per year is 44 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

vironmental impact of this property

is property's current environmental impact rating is A. It has the potential to be A.

pperties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.

operties with an A rating produce less CO2 than G rated properties.

6 tonnes of CO2

his property produces

n average household

roduces

0.4 tonnes of CO2

his property's potential roduction

making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 0.0 tonnes per year. This will help to steet the environment.

vironmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how ergy is consumed by the people living at the property.

https://find-energy-certificate.service.gov.uk/energy-certificate/9548-8064-7389-6721-2900

0.4 tonnes of CO2

ow to improve this property's energy performance

e assessor did not make any recommendations for this property.

<u>imple Energy Advice has guidance on improving a property's</u> <u>nergy use. (https://www.simpleenergyadvice.org.uk/)</u>

aying for energy improvements

1d energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

stimated energy use and potential savings

stimated yearly energy cost for this roperty

otential saving

e estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It i t based on how energy is used by the people living at the property.

e estimated saving is based on making all of the recommendations in how to improve this property's energy performance.

r advice on how to reduce your energy bills visit Simple Energy Advice (https://www.simpleenergyadvice.org.uk/).

eating use in this property

ating a property usually makes up the majority of energy costs.

stimated energy used to heat this property

pace heating

68 kWh per year

ater heating

1822 kWh per year

£232

f0

otential energy savings by installing insulation

e assessor did not find any opportunities to save energy by installing insulation in this property.

u might be able to receive <u>Renewable Heat Incentive payments (https://www.gov.uk/domestic-renewable-heat-incentive)</u>. This will lp to reduce carbon emissions by replacing your existing heating system with one that generates renewable heat. The timated energy required for space and water heating will form the basis of the payments.

ontacting the assessor and accreditation scheme

is EPC was created by a qualified energy assessor.

ou are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

ou are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

creditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
