SOLD

****IDEAL FIRST TIME BUYER PROPERTY** **DRIVEWAY** **DINING ROOM** **QUIET LOCATION****

Southwells are pleased to bring to the market this 3 bedroom semi-detached house. Close to the town centre of Rugeley and all of its local amenities this property boasts gas central heating, double glazing and a driveway along with the following accommodation:

Front of Property

Block paved driveway. Maintainable front lawn. Side access gate to rear. Canopy porch over front door.

Entrance Hall

Wooden front door into entrance hall. Carpeted flooring. Light fitting to ceiling. Radiator. Understairs cupboard. Doors off to Lounge and Kitchen. Stairs off.

Lounge: 12'06" (3.82m) x 11'00" (3.37m)

Front facing window. Carpeted flooring. Radiator. Light fitting to ceiling. Doors into Dining room.

Dining Room: 9'06" (2.90m) x 7'09" (2.36m)

Rear facing window. Serving hatch window to Kitchen. Carpeted flooring. Light fitting to ceiling. Radiator.

Kitchen: 10'04" (3.15m) x 9'00" (2.76m)

Rear facing window. Wooden door to rear garden. Vinyl flooring. Range of wall and base units. Stainless steel sink and drainer. Plumbing for washing machine. Integrated 'Hotpoint' oven and hob. Light fitting to ceiling. British Gas boiler to wall.

Stairs and Landing

Enclosed stairway. Carpeted flooring. Light fitting to wall at top of stairs. Loft hatch to ceiling. Radiator. Side facing opaque window to top of stairs. Doors off to all upstairs rooms and airing cupboard (containing water heater)

Bedroom 1: 9'09" (2.99m) x 11'08" (3.58m)

Front facing window. Radiator. Light fitting to ceiling. Carpeted flooring. Built in wardrobe.

Bedroom 2: 10'10" (3.20m) x 7'02" (2.19m)

Rear facing window. Radiator. Light fitting to ceiling. Carpeted flooring.

Bedroom 3: 8'11" (2.72m) x 5'08" (1.74m)

Front facing window. Radiator. Light fitting to ceiling. Carpeted flooring. Storage cupboard.

Shower Room: 5'01" (1.56m) x 6'02" (1.89m)

Rear facing opaque window. Vinyl flooring. Radiator. Light fitting to ceiling. Walk in shower cubicle with electric shower to wall. White sink with mixer tap set in vanity unit.

Toilet

Separate WC with rear facing opaque window. Vinyl flooring. Light fitting to ceiling. Low level white toilet

Rear of property

Enclosed rear garden with block paved patio area, lawns and borders. Brick outhouse. Side access to front of property.

TENURE: FREEHOLD (though this has yet to be verified by solicitors)

£155,000

32 John Till Close , WS15 2AF

SOLD

27, John Till Close, RUGELEY, WS15 2AF

Dwelling type: Semi-detached house
Date of assessment: 06 June 2017
Date of certificate: 06 June 2017

Reference number: 8373-7226-5170-8236-0902
Type of assessment: RdSAP, existing dwelling
Total floor area: 73 m²

Use this document to:

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:	£ 2,943
Over 3 years you could save	£ 1,314

Estimated energy costs of this home			
	Current costs	Potential costs	Potential future savings
Lighting	£ 285 over 3 years	£ 150 over 3 years	
Heating	£ 2,094 over 3 years	£ 1,263 over 3 years	
Hot Water	£ 564 over 3 years	£ 216 over 3 years	
Totals	£ 2,943	£ 1,629	

These figures show how much the average household would spend in this property for heating, lighting and hot water and is not based on energy used by individual households. This excludes energy use for running appliances like TVs, computers and cookers, and electricity generated by microgeneration.

Energy Efficiency Rating

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).

The EPC rating shown here is based on standard assumptions about occupancy and energy use and may not reflect how energy is consumed by individual occupants.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Floor insulation (solid floor)	£4,000 - £6,000	£ 144	
2 Draught proofing	£80 - £120	£ 27	
3 Low energy lighting for all fixed outlets	£45	£ 111	

See page 3 for a full list of recommendations for this property.

To find out more about the recommended measures and other actions you could take today to save money, visit www.gov.uk/energy-grants-calculator or call **0300 123 1234** (standard national rate). The Green Deal may enable you to make your home warmer and cheaper to run.

Summary of this home's energy performance related features

Element	Description	Energy Efficiency
Walls	Cavity wall, filled cavity	★★★★☆
Roof	Pitched, 250 mm loft insulation	★★★★☆
Floor	Solid, no insulation (assumed)	—
Windows	Single glazed	★☆☆☆☆
Main heating	Boiler and radiators, mains gas	★★★★☆
Main heating controls	Programmer and room thermostat	★★★☆☆
Secondary heating	None	—
Hot water	From main system	★★★☆☆
Lighting	Low energy lighting in 10% of fixed outlets	★★☆☆☆

Current primary energy use per square metre of floor area: 339 kWh/m² per year

The assessment does not take into consideration the physical condition of any element. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology based on age and type of construction.

Low and zero carbon energy sources

Low and zero carbon energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon. There are none provided for this home.

Your home's heat demand

For most homes, the vast majority of energy costs derive from heating the home. Where applicable, this table shows the energy that could be saved in this property by insulating the loft and walls, based on typical energy use (shown within brackets as it is a reduction in energy use).

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	9,255	N/A	(241)	N/A
Water heating (kWh per year)	2,750			

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat, subject to meeting minimum energy efficiency requirements. The estimated energy required for space and water heating will form the basis of the payments. For more information, search for the domestic RHI on the www.gov.uk website.

Recommendations

The measures below will improve the energy performance of your dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions you could take today to save money is available at www.gov.uk/energy-grants-calculator. Before installing measures, you should make sure you have secured the appropriate permissions, where necessary. Such permissions might include permission from your landlord (if you are a tenant) or approval under Building Regulations for certain types of work.

Measures with a green tick  may be supported through the Green Deal finance. If you want to take up measures with an orange tick  through Green Deal finance, be aware you may need to contribute some payment up-front.

Recommended measures	Indicative cost	Typical savings per year	Rating after improvement	Green Deal finance
Floor insulation (solid floor)	£4,000 - £6,000	£ 48	 D59	
Draught proofing	£80 - £120	£ 9	 D60	
Low energy lighting for all fixed outlets	£45	£ 37	 D61	
Heating controls (thermostatic radiator valves)	£350 - £450	£ 32	 D63	
Replace boiler with new condensing boiler	£2,200 - £3,000	£ 194	 C71	
Solar water heating	£4,000 - £6,000	£ 42	 C72	
Replace single glazed windows with low-E double glazed windows	£3,300 - £6,500	£ 76	 C75	
Solar photovoltaic panels, 2.5 kWp	£5,000 - £8,000	£ 273	 B87	

Alternative measures

There are alternative measures below which you could also consider for your home.

- Biomass boiler (Exempted Appliance if in Smoke Control Area)
- Air or ground source heat pump
- Micro CHP

Opportunity to benefit from a Green Deal on this property

Green Deal Finance allows you to pay for some of the cost of your improvements in instalments under a Green Deal Plan (note that this is a credit agreement, but with instalments being added to the electricity bill for the property). The availability of a Green Deal Plan will depend upon your financial circumstances. There is a limit to how much Green Deal Finance can be used, which is determined by how much energy the improvements are estimated to **save** for a 'typical household'.

You may be able to obtain support towards repairs or replacements of heating systems and/or basic insulation measures, if you are in receipt of qualifying benefits or tax credits. To learn more about this scheme and the rules about eligibility, call the Energy Saving Advice Service on **0300 123 1234** for England and Wales.

About this document and the data in it

This document has been produced following an energy assessment undertaken by a qualified Energy Assessor, accredited by Elmhurst Energy Systems Ltd. You can obtain contact details of the Accreditation Scheme at www.elmhurstenergy.co.uk.

A copy of this certificate has been lodged on a national register as a requirement under the Energy Performance of Buildings Regulations 2012 as amended. It will be made available via the online search function at www.epcregister.com. The certificate (including the building address) and other data about the building collected during the energy assessment but not shown on the certificate, for instance heating system data, will be made publicly available at www.opendatacommunities.org.

This certificate and other data about the building may be shared with other bodies (including government departments and enforcement agencies) for research, statistical and enforcement purposes. For further information about how data about the property are used, please visit www.epcregister.com. To opt out of having information about your building made publicly available, please visit www.epcregister.com/optout.

Assessor's accreditation number: EES/012055
Assessor's name: Mr. Greg Rowbotham
Phone number: 07975 522672
E-mail address: greg@gjrpropertiesolutionsltd.co.uk
Related party disclosure: No related party

There is more information in the guidance document *Energy Performance Certificates for the marketing, sale and let of dwellings* available on the Government website at: www.gov.uk/government/collections/energy-performance-certificates. It explains the content and use of this document, advises on how to identify the authenticity of a certificate and how to make a complaint.

About the impact of buildings on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in homes produces over a quarter of the UK's carbon dioxide emissions.

The average household causes about 6 tonnes of carbon dioxide every year. Based on this assessment, your home currently produces approximately 4.4 tonnes of carbon dioxide every year. Adopting the recommendations in this report can reduce emissions and protect the environment. If you were to install these recommendations you could reduce this amount by 3.1 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions based on standardised assumptions about occupancy and energy use. The higher the rating the less impact it has on the environment.
